# Berrybank Stage - 1 Wind Farm

## Wind Turbine Generators

The installation and crane crews have continued to work hard over the past month to now having completed the main installation of a further 8 turbines, bringing the total of completed installations to 41 out of the 43 Wind Turbine Generators.

## On-site & Off-site Substation

The works at the on-site substation are nearing completion, and pre-commissioning works are underway. The remaining works around the off-site substation are nearing completion with the final clean up works under way. Over the next month we will see testing begin on both of the substations.

## Transmission Line

The final installation of the remaining 8 poles has now been completed and the stringing of the lines between the on-site and off-site substations are currently under way.

# Berrybank Stage - 2 Wind Farm

## Naturgy (GPG) increases its presence in Australia with the award by the Australian Capital Territory (ACT) of 107 MW Wind Farm.

- With this award, Naturgy (GPG) increases its current presence in Australia by more than 50% and confirms its commitment to renewables growth in the country.
- Berrybank Stage-2 Wind Farm is the second project awarded in a public auction by the ACT Government to Naturgy, through Global Power Generation (GPG) in Australia.

The ACT Government announced on Tuesday 8th September the award to Global Power Generation (GPG), a contract to build the 107 MW Berrybank Stage-2 Wind Farm.

The awarded contract is a 10 years Deed of Entitlement at a regulated tariff, for the energy equivalent to 100 MW capacity. Given the characteristics of the awarded contract and the conditions of the Australian market, one of the most attractive countries to invest in renewables, the project fully complies with the investment and profitability criteria required by Naturgy for value creation.

Berrybank Stage-2 Wind Farm will be Naturgy's fourth investment in Australia, through GPG. Including this project, Naturgy will reach a renewable capacity of approximately 600 MW in the region, together with the Crookwell 2 wind farm (96 MW), currently in operation, and Berrybank Stage-1 (180 MW), close to be operational and Ryan Corner (218 MW) recently awarded by Snowy Hydro.
